

CHICOPEE®

Building Care

Complete range of floor and surface
wiping solutions for your business

Chicopee® True Confidence™

chicopee.com

Total Solutions

Keeping your business clean and hygienic

Whether you're in a critical care environment, school, or office building, keeping your business clean and hygienic should be a priority.

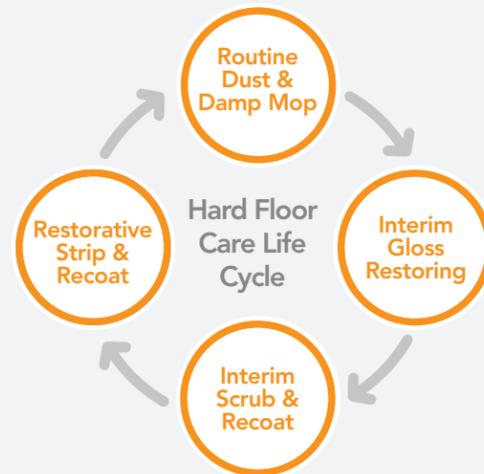

The health and well-being of employees and visitors are critical to the success of each establishment. Chicopee's® scientifically engineered wiping solutions help support your cleaning protocol needs.

Challenges

Dust and dirt build-up is inevitable on every kind of smooth floor or surface. Not only unattractive and unhygienic, but dust and dirt may also cause allergies or more serious health and safety problems. Traditional floor and surface cleaning cloths may contribute to the problem by transferring dirt and grime from one area to another.

Solutions

Chicopee's floor and surface wipes have several advantages over traditional cleaning. They offer superior dust and dirt pickup. Plus with their unique engineered design, Chicopee floor and surface wipes help ensure a higher standard of cleaning.

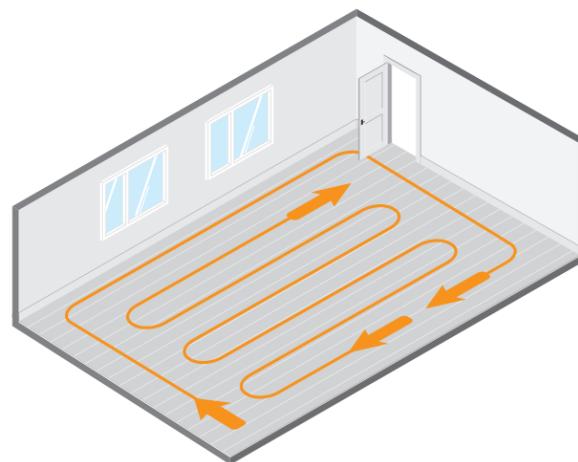

Consistent Cleaning

You have chosen the right type of wipe, but how do you ensure it's used correctly?

For best results:

- ✓ Dust off higher level surfaces first, then floors
- ✓ Dust mop to remove all surface soil, debris, sand, and grit
- ✓ Start at the side of the floor area
- ✓ Overlap wiped areas 25% for optimum clean
- ✓ Wipe from the overlap point and pull mop toward yourself

Solutions to ensure minimal effort and maximum results

Choosing the right wipe for your operation

Chicopee offers a wide range of solutions including dry/wet floor mops and microfiber or oil impregnated wipes. Use the table to help select the right product for your cleaning needs:

Chicopee®		Performance

*Estimated ft² cleaning when using a charging bucket for disinfectant contact (dwell) time compliance

**Estimated ft² when using the Chicopee Fluid Mopping System

Chicopee designs products to help you achieve:

- Improved employee and occupant health
- Improved worker/employee productivity

Hygienic Wet Mopping

Short term use microfiber mops for increased hygiene

Wet floor mopping has changed a lot since the original string mops. Flat mopping and the increasing use of microfiber based mops has increased effectiveness, reduced time, and lowered chemical consumption.

The focus is now shifting to short term use with disposable microfiber products. The environmental impact, as well as the cost of laundering microfiber mops may be much higher than most people assume. Switching to a disposable system can further reduce your overall costs as well as improve hygiene practices.*

Challenges

- Contaminated surfaces can serve as reservoirs for cross-contamination to patients**
- Traditional floor cleaning protocol is to use two mops per room and to change out dirty mop bucket chemicals every three rooms driving increased labor, chemical and laundry costs
- 93% of laundered mops still contain dangerous levels of bacteria after washing***

Solutions

- Chicopee Microfiber Mops disposed of after each room cleaned help to reduce the risk of cross contamination
- Through the elimination of laundry and reduced chemical usage Chicopee Microfiber Mops reduces cost in use versus traditional mopping
- Optimal floor cleaning procedures through fluid management and damp mopping can help reduce slip and fall hazards

Reduce cleaning time and eliminate the need for laundry

Chicopee Microfiber Super

Pre-impregnate in charging buckets on cleaning trolley

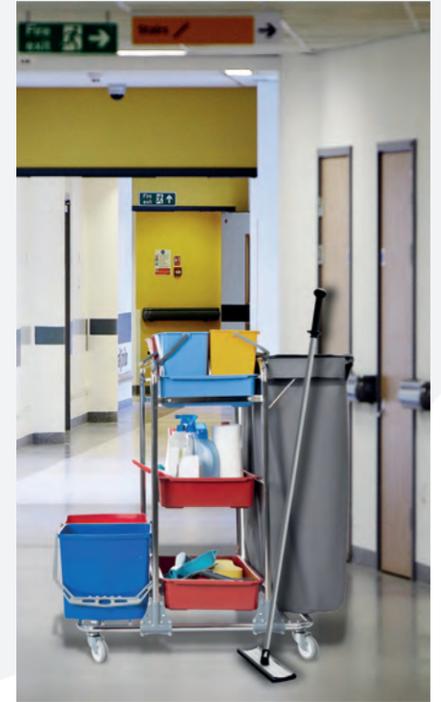

Challenges

- Laundering heavy duty microfiber flat mops is expensive, time consuming, and ineffective. It has been found that 93% of mops still contained dangerous level of bacteria after washing**
- Many disposable mops can only clean 130-150 ft² before drying out, which is less than traditional flat mops
- Conventional wet mopping practices can lead to custodial staff injuries through the repeated motions of mopping and wringing

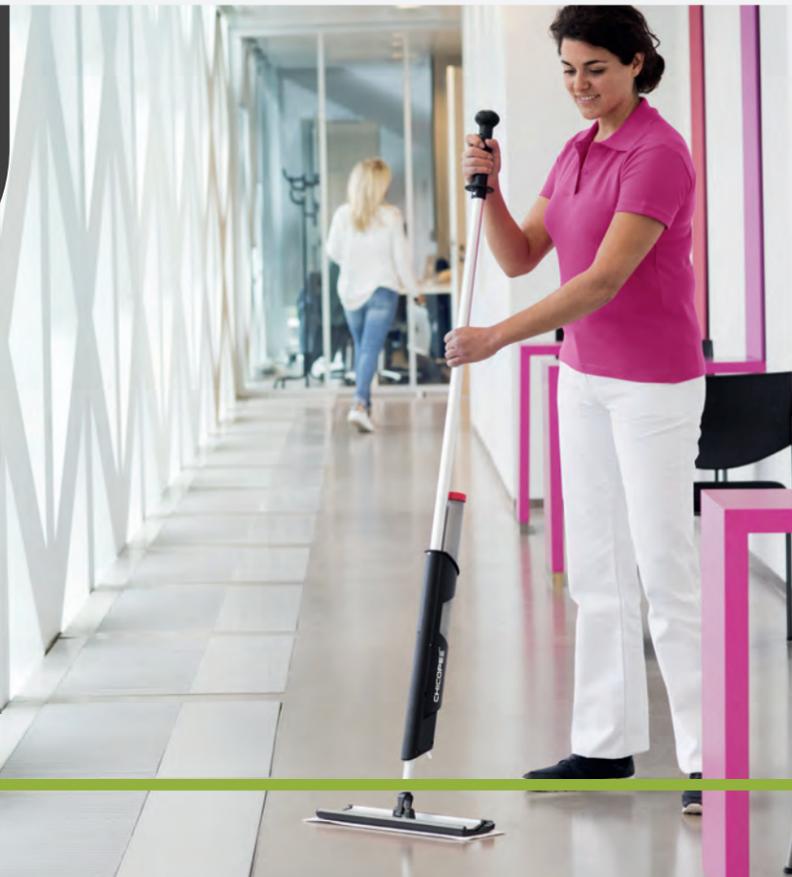

Solutions

- Chicopee's disposable Microfiber Floor Mop Super has a better cost in use than most traditional laundered mops, while having a lower environmental impact and reducing risk of cross contamination**
- Chicopee Microfiber Floor Mop Super is a unique composite product designed to match the performance of woven microfiber flat mops, cleaning up to 253 ft²
- Chicopee Microfiber Floor Mop Super is less work-intensive than conventional mops help reduce risk of custodial staff injuries

By using the Chicopee Fluid Mop System you can
CLEAN UP TO 1770 FT²

Chicopee Microfiber Economy & Light

For use with Chicopee Fluid Mopping System

Challenges

- Traditional mopping systems require the mop to hold a high amount of liquid; this often means a lot of liquid is released at the start and little at the end
- Traditional floor mops can be contaminated after laundering or rinsing, spreading dirt and bacteria and causing cross contamination
- Cleaning floors is a difficult job and employees can be hurt by bending and lifting

Solutions

- Chicopee Fluid Mopping System has a removable and reliable reservoir that eliminates the need for a mopping bucket thus reducing water consumption and the risk of spillages.
- Our unique range of short term use floor mops utilize microfiber technology to help capture dirt and bacteria in the mop, while helping to reduce the risk of cross contamination by discarding after use
- Ergonomically designed Fluid Mop System, combined with our short term use mops, makes the task easier without compromising on performance and protecting employees

The Economy and Light Microfiber Mops are able to clean between 745-1,770 ft² using the liquid on board the Chicopee Fluid Mopping System, thus allowing you to clean much larger areas than with traditional mopping

Ergonomic Cleaning Tools

Designed with cleaning staff in mind for ultimate ease of use

Chicopee® Fluid Mopping System™

The Chicopee Fluid Mopping System is a simple yet effective way to increase the speed of your floor cleaning process without compromising on quality. With a built-in fluid reservoir you can add up to 21oz of floor cleaning solution that can be dispensed as you clean with a push on the trigger.

Microfiber Designed for Use with the Fluid Mopping System

Attach the mop

Simply place the mop on the floor and rock head to engage with the micro fastener

Spray the floor

Pull the trigger to release cleaning fluid as needed

Clean area

Clean the desired area, remembering to pull the trigger as needed

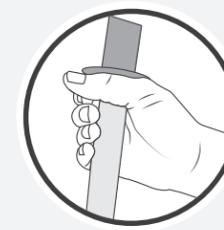

Disposal

Dispose and place the mop as needed

Simplicity in design for the ultimate in reliability

Features and Benefits

Design - Sure grip improves maneuverability

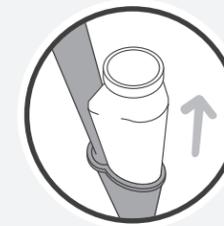

Large Trigger
One-handed operation

Handle Protection
Ring around handle base protects trigger if handle falls on the floor

Durable and Flexible

Aluminum core's one piece design and thick side walls for the ultimate in durability

Dry Technology

The Fluid System's dry technology valve never touches the cleaning solution, for reliability and chemical resistance

Microfiber Surface Cleaning

Our unique APEX™ technology creates a thicker yet soft and supple cloth

Chicopee Microfiber Light cloth provides the same superior cleaning performance as traditional woven microfiber cloths reducing the risk of cross contamination. Designed for short term use, it removes the need to launder cloths saving time and improving cleaning practices while still removing bacteria from surfaces.

Features and Benefits

Wipes Dry
Wipes surfaces dry to leave them residue free

Cleaning Agents
Compatible with most cleaning agents

Safe for use on multi surfaces
Provides streak free cleaning

Dusty™

Providing the perfect solution for above the floor cleaning

Dusty™ cloths from Chicopee® are designed for clean room facilities, healthcare environments, and more. Dusty cloths are engineered with a pressure-sensitive adhesive on the cloth that traps and holds dust effectively without leaving residue on floors, surfaces, or your hands. The cloths also feature a unique open structure that captures dust and keeps it there.

Features and Benefits

Pre-impregnated
Ready to use out of the pack, no need to spray or soak

Disposable
Reduces risk of cross contamination and eliminates laundry costs

Engineered fabric
For consistent and reliable performance

Superior cleaning with bacteria removal

Our unique structure provides quick and easy cleaning of many hard to clean surfaces, reducing chemicals usage.
