#4 Vented MeyerPak™ with 3-cell “burger box” divider

MPBD4000

MPKV0044

Made in the USA!

FC Meyer is pleased to introduce the MeyerPak #4 Ventilated™ Combo Box!

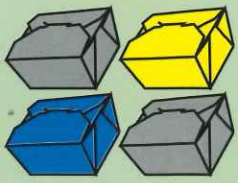

Burgers, Chicken, Pulled Pork, Brisket, Fish Fillet Sandwiches – and more – can now be packed to go or for a delivery with pride in the new MeyerPak #4 Ventilated™ box. This **breakthrough** packaging system combines induction ventilation with a 3-quadrant divider that separates the sides from the burger\bun as well as the lettuce\tomato and onion condiments so that all three retain their textural desirability.

The fries are divided to the top of the box, enabling this side of the box to be ventilated from the bottom to circulate the warm air so the fries don’t get soggy as the steam rises out the top vents, which circulates the air around the fries. The next quadrant keeps the burger and bun warm while the third, smallest quadrant separates the condiments so they stay cold and fresh and do not wilt nor make the bun soggy.

Items ordered separately. Available for immediate shipment. PATENTED!

<u>Description</u>	<u>Manufacturer Item #</u>	<u>Case Count</u>

FC Meyer Environmentally Sound Packaging -

A closed loop for Sound Environmental Packaging

- FC Meyer Packaging is proud to be Certified by the Forestry Stewardship Council.[®] Our Product represents not only the highest quality and value it also represents the end result of a manufacturing process that has an environmental commitment that extends from utilization of 100% recycled paperboard right down to the water based adhesives used in the finishing (gluing) process.

WASTE STREAM

- The waste stream that makes up the recycled fiber includes old corrugated, old newspapers and mixed papers. We recycle all our cores, metal strapping, pallets and even our inks, which we recycle to black.

PRINTING

- The printing process at FC Meyer Packaging are Flexographic and Offset printing processes which use 100% water-based inks and coatings for Flexo and soy-based inks for Offset.

ADHESIVES

- The FC Meyer adhesives are all water-based, drain safe materials that are no VOCs and are as safe as the pastes used by our children in elementary school.
- The FC Meyer Packaging Manufacturing Processes provide an excellent product to the end user with the bonus and satisfaction of knowing that for the most part, we used only the materials that were used before and that we left the environment the same as we found it.

The Ultimate Environmentally Correct Package – FC Meyer Packaging

is one of the only paperboard packaging manufacturers in the world that is capable of making the highest post consumer waste content, process chlorine free package through our unique coating process that allows the highest recycled paperboard to be functional, attractive and have an appropriate barrier to grease and moisture.
