

WADDINGTON® NORTH AMERICA
FOODSERVICE CATALOG

■ Waddington® North America Brand Profile

■ PREMIUM FOOD PACKAGING & FOODSERVICE PRODUCTS

Waddington North America (WNA), has seven manufacturing locations located throughout North America and is proud to be a part of Novolex®. Novolex develops and manufactures diverse packaging products for multiple industries in the foodservice, delivery and carryout, food processing and industrial markets that touch nearly every aspect of daily life. The Novolex family of brands provides customers with innovative food and delivery packaging and performance solutions products for their business needs today while investing in research and development to engineer more sustainable choices for the future. With more than 10,000 employee families, Novolex operates manufacturing facilities in North America and Europe, including two world-class plastic film recycling centers.

■ SUSTAINABILITY VISION

The Novolex vision for sustainability is to innovate more sustainable choices for our customers, operate responsibly and invest in our people and communities. We bring this vision to life every day through our ongoing focus on efficiency in our operations, as well as through partnerships with customers, suppliers, communities and others in the industry to develop solutions that reduce the impact our products can have on the environment.

■ Custom Packaging Design

If you can think it, we can make it.

We are . . . INNOVATIVE

Creativity is our fuel. We are never satisfied with “good enough”. Pioneering is what we do. We think big, break new ground and take risks accordingly.

We constantly aim to deliver a better bundle of products, better service, better quality, and better innovation. As a result, we provide innovative, stylish, and functional food service and packaging solutions that provide convenience and sophistication.

From Concept to Completion®, our engineers and in-house design team work with you to seamlessly develop the product that is right for your application. Therefore, if we do not have a product that fits your needs, we can develop an innovative custom product complete with custom embossing or imprinting that will result in your distinctive branding success.

Our customization process below shows how we work with you to design the best packaging to meet your needs and satisfy your customers.

Let's Talk

We will meet with you to better understand your goals and discover how we can develop a custom product that meets your business needs.

Let's Collaborate

Our in-house design team will hand draw some possible solutions, get your input and revise as necessary.

Let's See

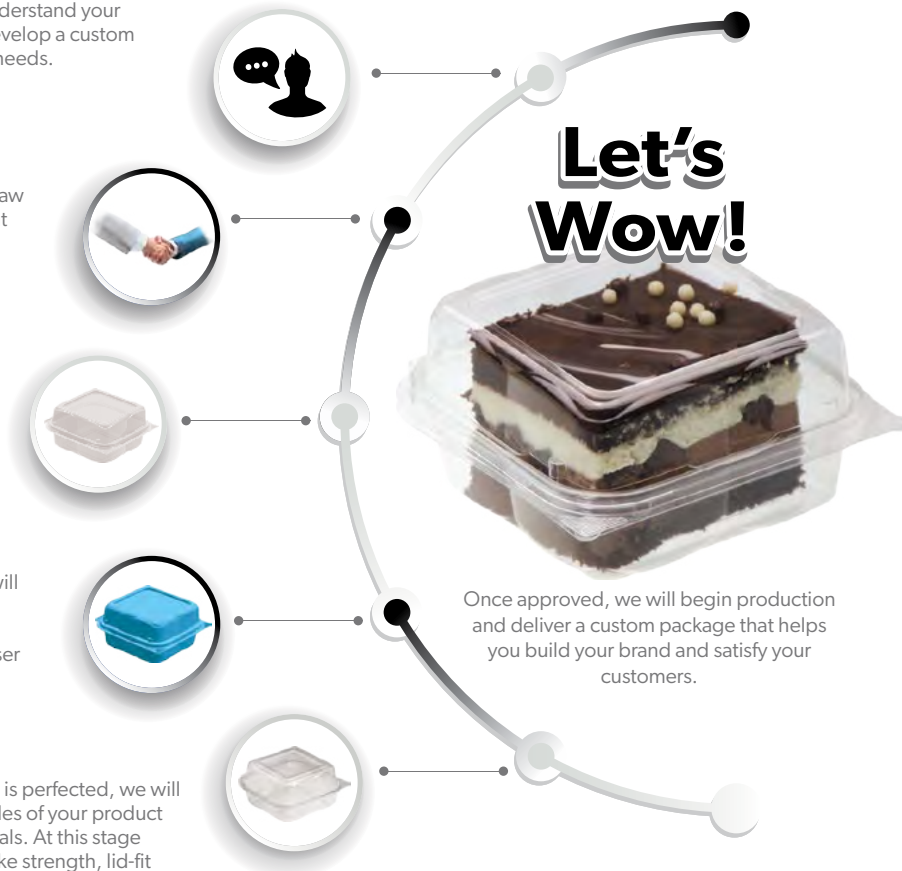

Working off the sketches, our design team will create a dimensionally accurate digital model.

Let's Get Real

Using the computer renderings, we will create a physical model using rapid prototyping technology to provide a real-life example of shape, size and user experience.

Let's Give it a go!

When the initial design is perfected, we will create functional samples of your product out of the actual materials. At this stage we will test for things like strength, lid-fit and leak resistance.

Once approved, we will begin production and deliver a custom package that helps you build your brand and satisfy your customers.

Materials and Recycle Information

Most WNA products can be either single-use (use and throw away) or hand-washed and reused. Our plastic tableware products are recyclable where facilities exist. Recycling facilities may not exist in your area. Please support recycling in your community.

Material	Benefits	Temp Range
PET / PETE / RPET	High-Gloss finish, excellent clarity, lightweight, resistant to cracking and crushing	0°F to 140°F
HDPE	Good flexibility, lightweight, good impact resistance	32°F to 175°F
LDPE	Excellent flexibility, lightweight, resistant to cracking, high impact strength	0°F to 150°F
Polypropylene	Durable, strong, heat resistant, retains flexibility at low temperatures, microwavable	32°F to 215°F
Polystyrene	Rigid superior strength, exceptional clarity	40°F to 180°F
ABS	Durable, strong, heat resistant retains flexibility at low temperatures, microwavable	40°F to 185°F
