

POLAR PAK™
YOUR COMPLETE FOOD PACKAGING
SOLUTIONS CATALOG

■ PROVIDING PRODUCTS THAT MAKES LIFE FUNCTIONAL

Polar Pak is one of the leading manufacturers of food packaging solutions, serving the food processor, bakery and grocery.

Our food packaging solutions includes Tamper-Evident containers like Smart-Tab® containers that have an innovative pull tab that works just like a soda can but the lid is resealable again and again and the tab will stay raised to warn you that the container has been tampered with.

All of our manufacturing plants are BRC- and Kosher-certified and comply with all industry standards for safety. Our materials are approved for food contact, and our facilities are inspected regularly by third-party auditors.

We value creating products that make life better.

■ SUSTAINABILITY

Our commitment to sustainability drives us to innovate packaging choices to reduce the impact that Novolex--and our customers and their consumers--have on the environment. This vision comes to life every day through our focus on product development, efficiency and safety in our operations, and partnerships with customers, suppliers, communities and policy makers. By operating our businesses responsibly and investing in our people and communities, we create more opportunities to be responsible corporate citizens. Learn more about our approach to sustainability in the Novolex Sustainability Report, available at www.novolex.com.

We continue to innovate and educate our customers on more sustainable choices.

Our 2022 catalog features:

Expanded line of rPET Products: Using recycled PET (rPET) helps reduce the environmental impact of our products and supports the circular economy. In a circular economy, packaging can be recycled and converted into raw material that can be used to make new products. We now feature products made with 25-100% post-consumer recycled (PCR) rPET. We call our expanded line Eco Blend™. Inquire about our growing capabilities in this area to learn more about how we can tailor solutions for your sustainability requirements.

■ ECO BLEND™ PURA

Our products manufactured with **Eco Blend Pura™** rPET are made entirely from 100% PCR rPET. Eco Blend Pura material can be used to make food packaging Item#s across our PET portfolio of products. These are suitable for packaging a wide range of food Item#s from baked goods to fresh produce and are recyclable where facilities exist.

■ ECO BLEND™

Products manufactured from **Eco Blend™** rPET are available containing 25%, 50% or 75% PCR content, blended with post-industrial (PI) recycled material and virgin resin. This offers customers the same superior shelf display and food safety as traditional PET, but with an added environmental benefit based on each customer's sustainability goals.

How2Recycle® Consumer-focused labeling

At Novolex, part of our commitment to sustainability is to empower consumers to properly recycle products. As a member of the Sustainable Packaging Coalition® and the How2Recycle® program, Novolex is one of the forward thinking brands that strives to lead the way by instituting a labeling program for stock products to better identify materials and recycling opportunities. The How2Recycle® label represents a standardized system that clearly communicates recycling instructions to the public. Novolex also partners with customers to include the appropriate How2Recycle label on their products.

■ SPECIALTY PACKAGING

For more information about our products please visit www.polarpak.ca or [click here](#)

■ Custom packaging design

As menus and food trends evolve, we want to grow with you. From Concept to Completion, our engineers and in-house design team work with you to seamlessly develop the product that is right for your application. Therefore, if we do not have a product that fits your needs, we can develop an innovative custom product complete with custom embossing that will result in your distinctive branding success.

Our customization process below shows how we work with you to design the best packaging to meet your needs and satisfy your customers.

■ Concept to completion® in 6 steps

1

LET'S TALK

We will meet with you to better understand your goals and discover how we can develop a custom product that meets your business needs.

2

LET'S COLLABORATE

Our in-house design team will hand draw some possible solutions, get your input and revise as necessary.

3

LET'S SEE

Working off the sketches, our design team will create a dimensionally accurate digital model.

4

LET'S GET REAL

Using the computer renderings, we'll create a physical model using rapid prototyping technology to provide a real-life example of shape, size and user experience.

5

LET'S GIVE IT A GO

When the initial design is perfected, we'll create functional samples of your product out of the actual materials. At this stage we'll test for things like strength, lid-fit and leak resistance.

6

LET'S WOW

Once approved, we will begin production and deliver a custom package that help you build your brand and satisfy your customers.

■ Customize with debossing

Embossing helps deliver maximum impact, and brand awareness. It adds appeal to our packaging, and encourages your customers to reuse the container.

■ Embossing examples

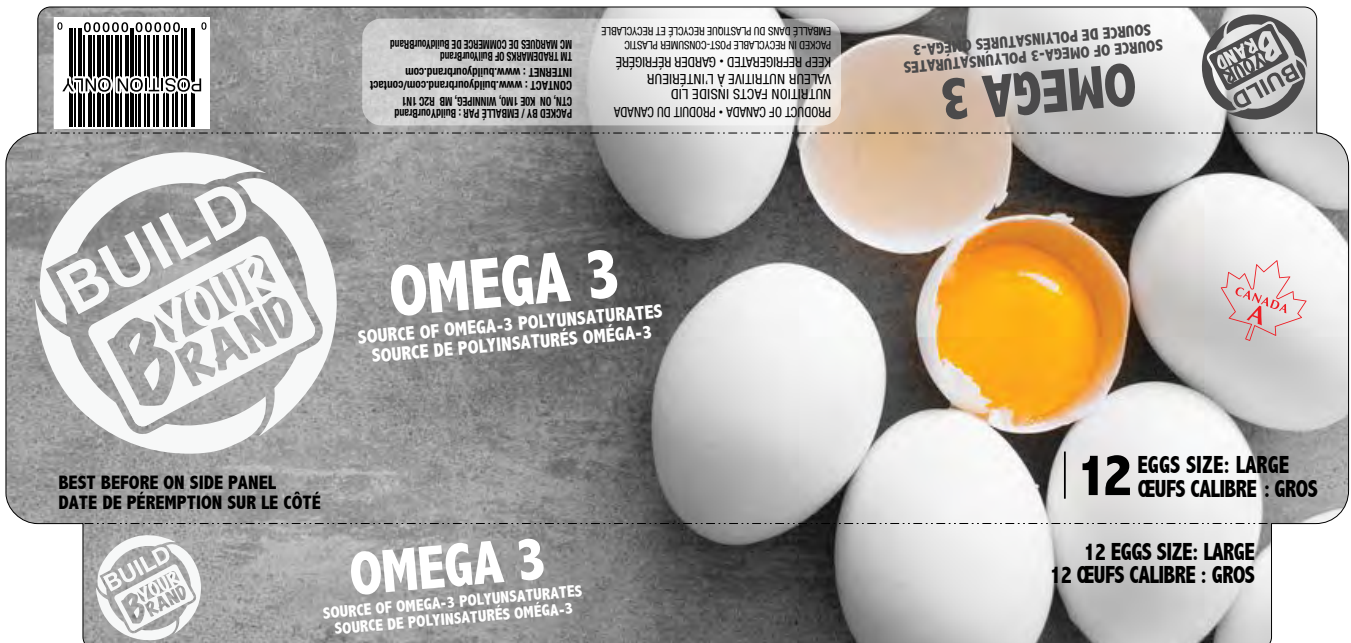

Let us label it

Decrease your labour costs by utilizing our pre-labeling service.

Whether provided, or we print and apply, our goal is to help take the worry out of labeling for you.

Ask how we can help!

Labels examples

■ PROVIDING PRODUCTS THAT MAKES LIFE FUNCTIONAL

Polar Pak is one of the leading manufacturers of food packaging solutions, serving the food processor, bakery and grocery.

Our food packaging solutions includes Tamper-Evident containers like Smart-Tab® containers that have an innovative pull tab that works just like a soda can but the lid is resealable again and again and the tab will stay raised to warn you that the container has been tampered with.

All of our manufacturing plants are BRC- and Kosher-certified and comply with all industry standards for safety. Our materials are approved for food contact, and our facilities are inspected regularly by third-party auditors.

We value creating products that make life better.
