

# DIRECT PACK

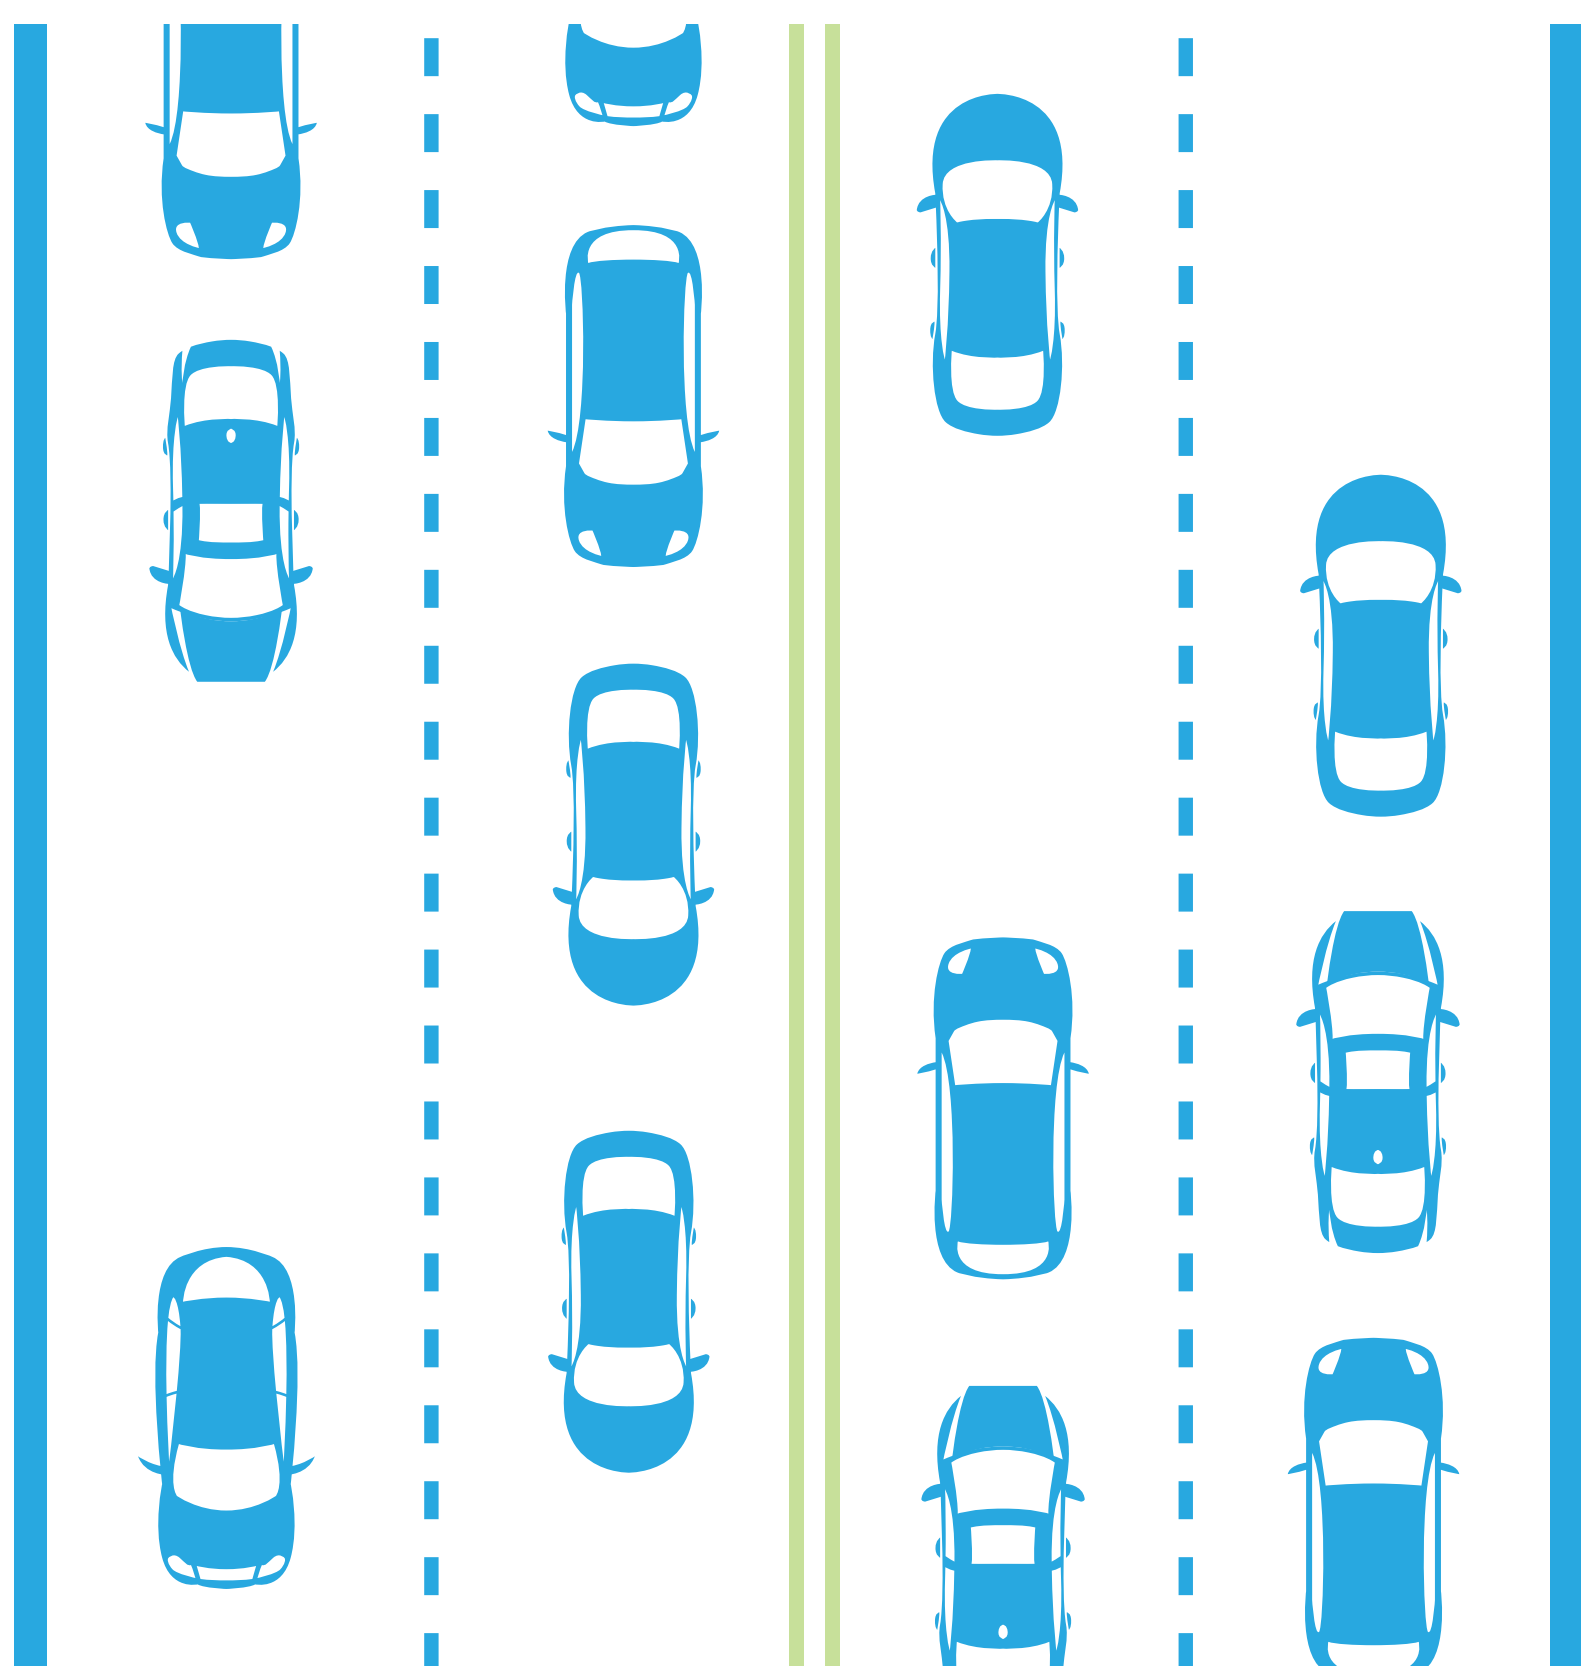

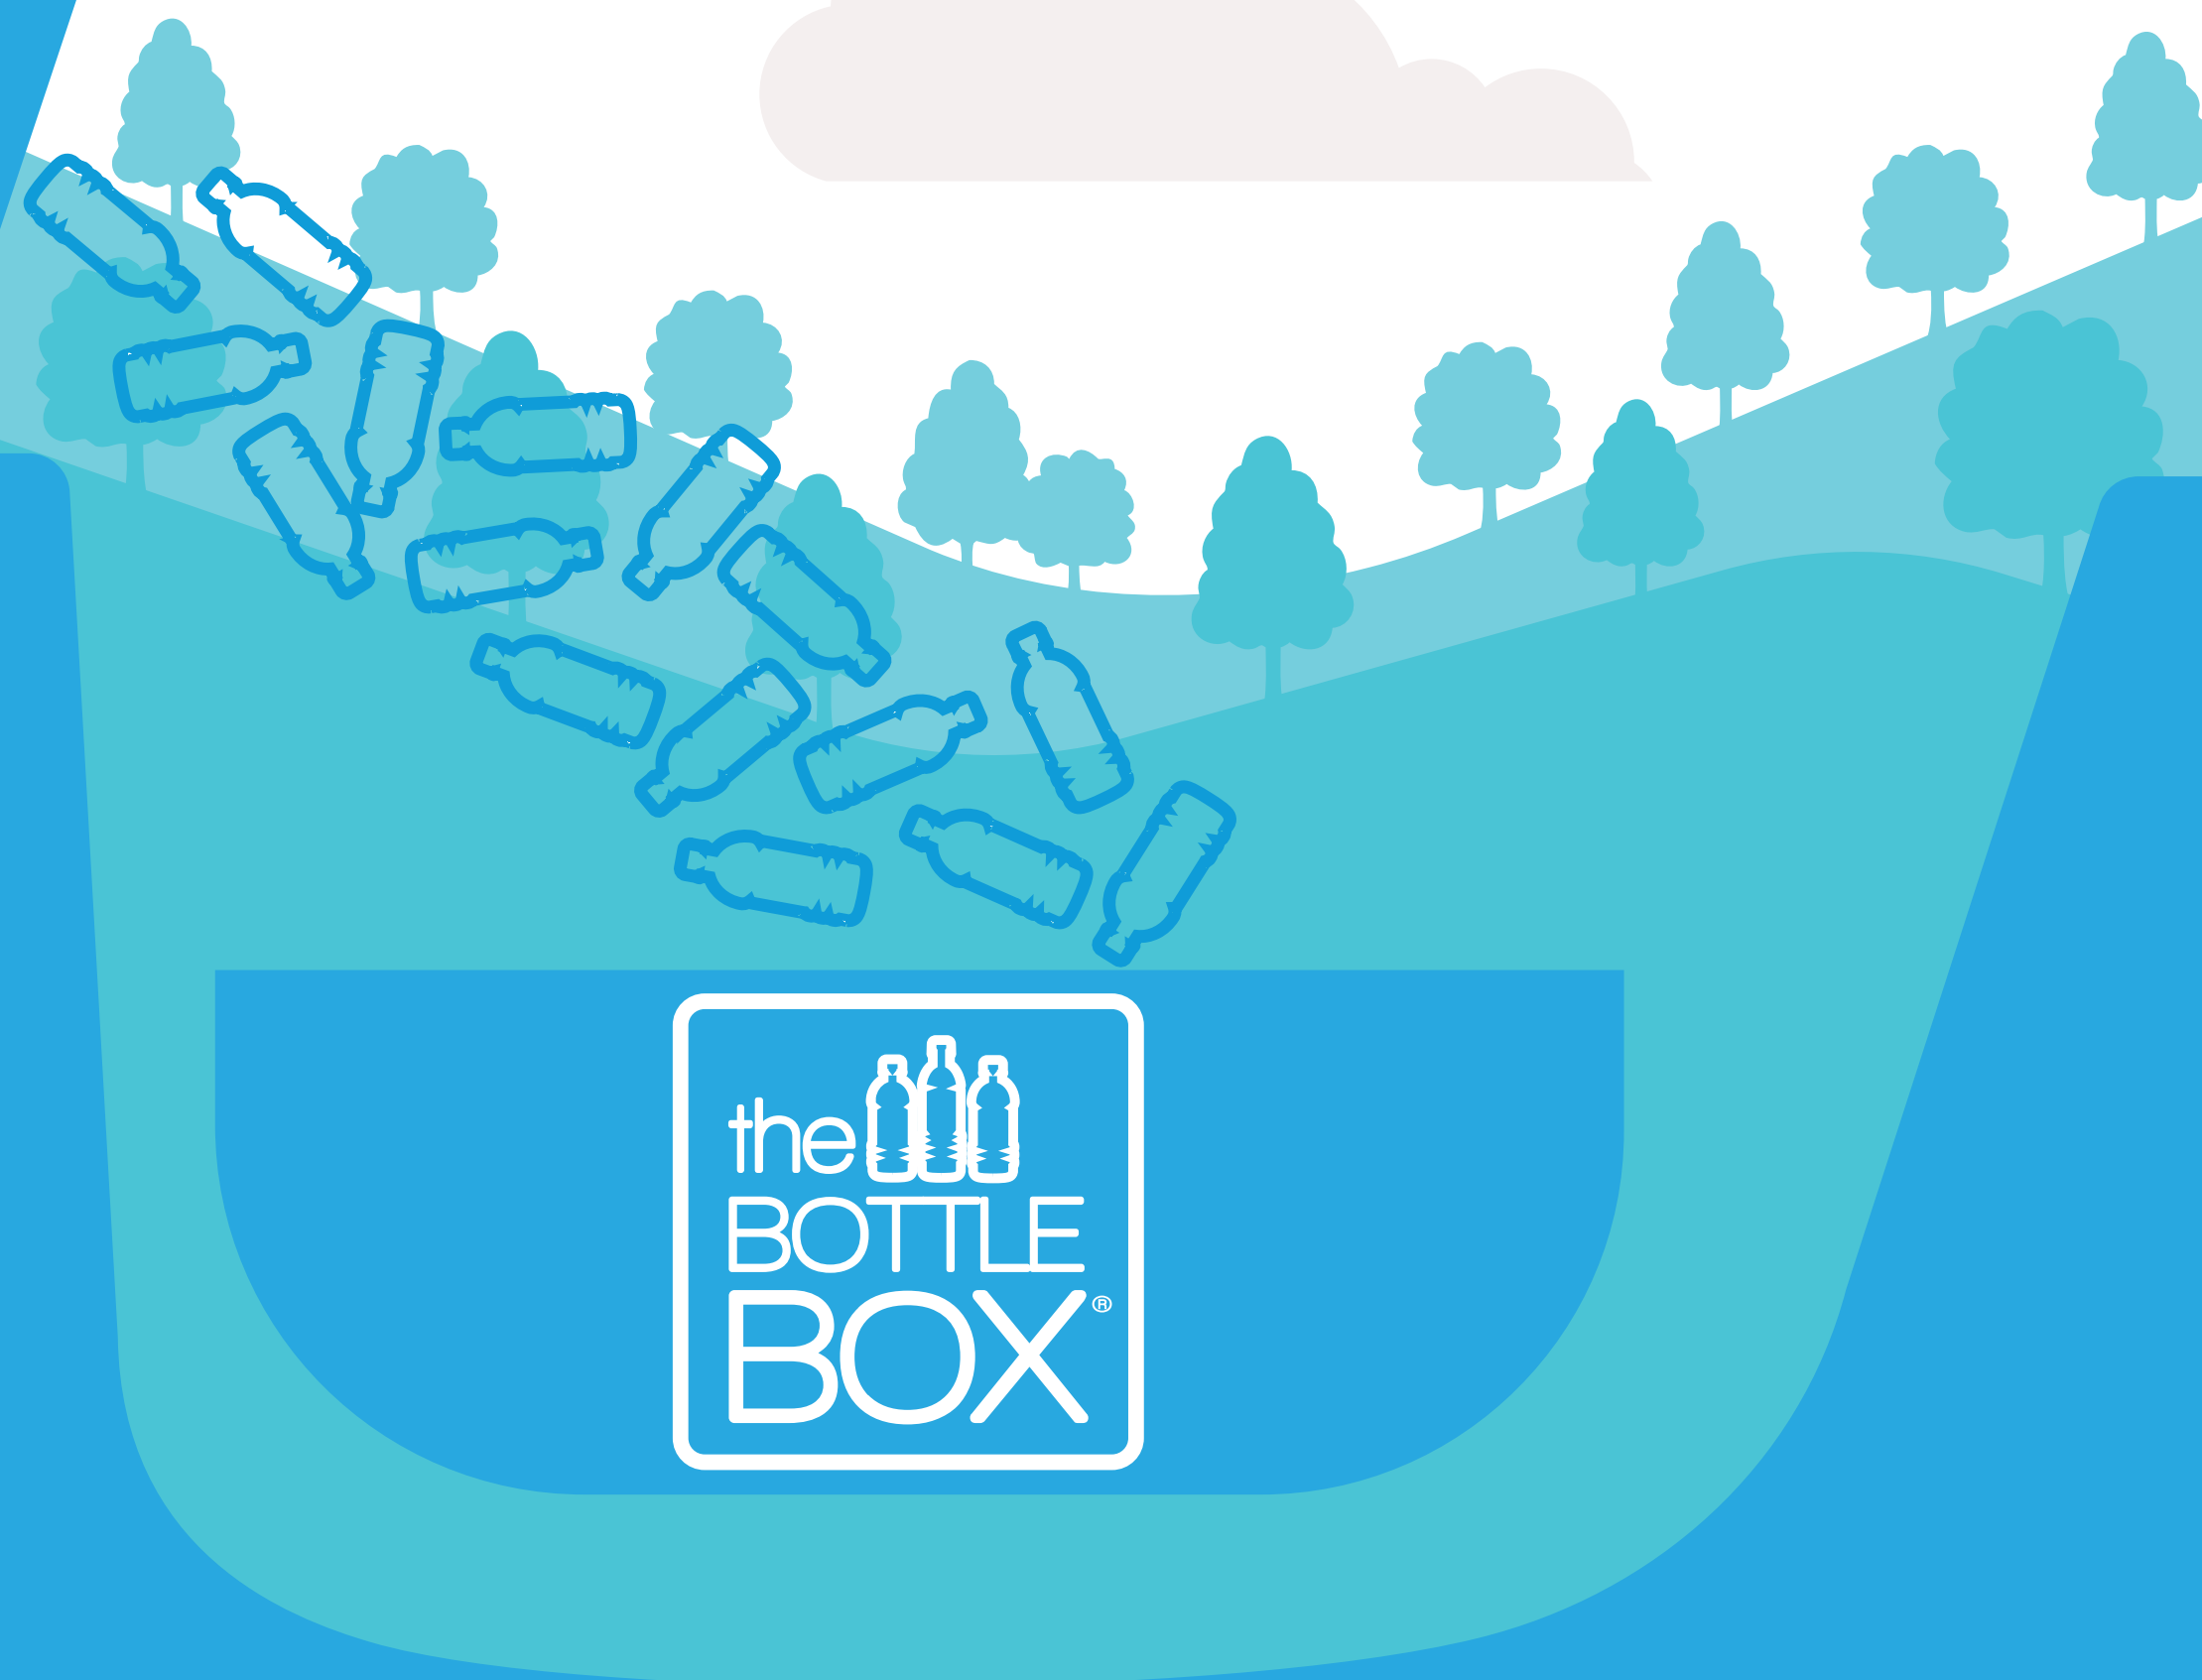

We use recycled plastic bottles to make sustainable takeout packaging

BOTTLEBOX® has saved 65 million pounds of plastic from ending up in a landfill

That's equivalent to...

Taking more than  
**7,750 cars**  
off the road  
each year

# THE BOTTLEBOX<sup>®</sup> STORY

The original take-out container  
made from recycled beverage bottles

## BOTTLES

- ① You recycle a plastic bottle.
- ② The recycling center receives the bottles in big bales.

## FLAKES

- ③ The bottles are sorted by color and ground up into flakes.
- ④ The flakes are thoroughly washed to meet food grade standards.

## CONTAINERS

- ⑤ During extrusion the flakes are turned into large rolls of recycled PET.
- ⑥ The rolls are used in a thermoforming process to make the BOTTLEBOX<sup>®</sup> containers.
