

Compostable Can Liners by OneEarth™ Packaging

These liners are ideal for composting applications like food, yard, and organic waste materials. Once placed in a municipal or commercial composting environment, decomposition will occur naturally.

These bags meet ASTM D6400, “Standard Specifications for Compostable Plastics,” and are intended to be composted in a professionally managed composting facility operated in accordance with best composting management practices. Check to see if such a facility exists in your community.

Compostable Can Liners
