

Per-and Poly-Fluoroalkyl Substances (PFAS) Statement

January 2023

Dear Valued Customer,

The following information is provided in good faith and the best of our knowledge. Kari-Out is aware of EPA PFAS requirements, such as municipal water levels for PFOA and PFOS, and legislation by multiple states further regulating the entire class of PFAS, especially in food contact packaging.

Kari-Out products are not manufactured with PFAS, such as PFOA and PFOS, for the purpose of providing water and grease resistance.

Kari-Out products may be manufactured with processing aids containing PFAS, the use of which are intended to provide lubrication during the manufacturing process are not intended to have a technical effect on the final packaging product. All PFAS used for this purpose comply with regulations for use in food contact packaging under 21 CFR 174-189, including 177.1350 (ethylene-vinyl acetate copolymers) and 177.1520 (olefin polymers).
