

Simple & effective solutions for  
everyday foodservice challenges

## Your customers want affordable solutions. This one has stood the test of time.

*That's right, we're talking about the classic GuestCheck™*

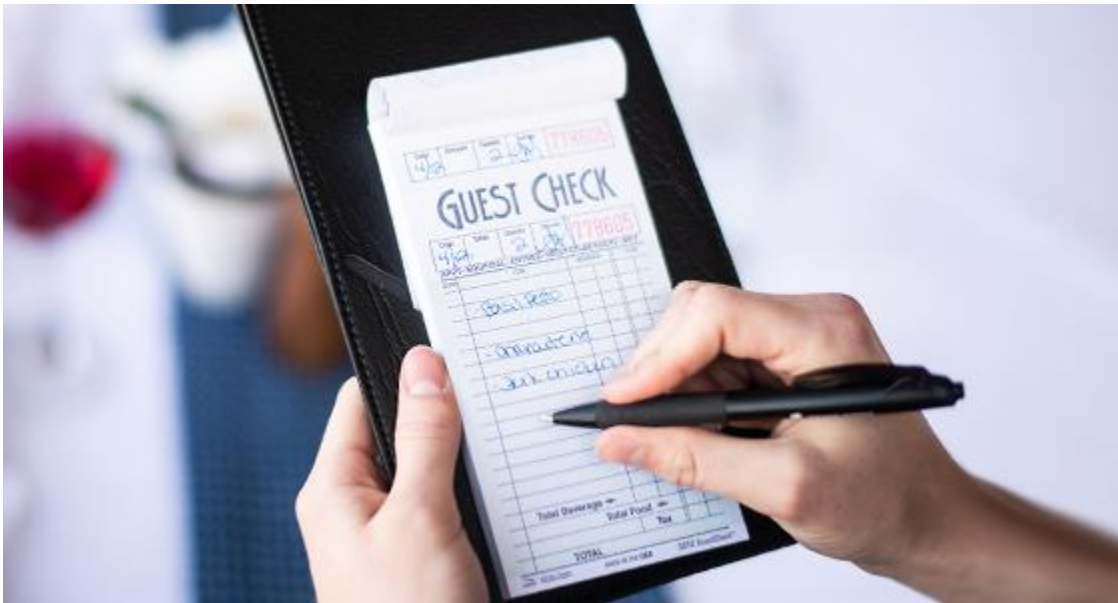

Let's be honest, **restaurants are strapped for cash**. So, **they're looking for simple, proven solutions** that get the job done and save money.

That's where **the GuestCheck™ can help**.

Simple, affordable, and beloved—the GuestCheck has stood the test of time for almost a century, and restaurants keep coming back to it.

Why? It's because **the GuestCheck works** and because businesses keep finding relevant ways to use it.

**So, what are some ways this time-tested, affordable solution benefits restaurants?**

## The GuestCheck improves accuracy

Simply put, relaying orders based on memory can lead to mistakes.

By providing an organized place to record information, the GuestCheck improves order accuracy.

That means less food being returned and more happy customers. It's a win-win.

## The GuestCheck improves efficiency & helps food get to the correct table

By including a space to record table numbers, the GuestCheck helps servers remember which orders go to which tables.

That's especially helpful for restaurants that changed their seating charts due to dining restrictions.

## The GuestCheck helps restaurants & servers *sell even more*

The prompts on the GuestCheck remind servers to ask about appetizers, desserts, and drinks, which helps *restaurants earn more money per guest*.

Costing only a few **pennies per page**, the GuestCheck more than pays for itself with almost any extra item a customer adds to their order.

**Don't wait to cash in on this extra source of revenue. Talk to your customers about the benefits of the GuestCheck today.**
