

# SurFACE-OFF

Sani Professional® No-Rinse Sanitizing Multi-Surface Wipes Win  
Over the Rag and Bucket Every Time!

VS.

## FOOD CODE COMPLIANCE

- ✓ Each Sani Professional® wipe consistently releases the right level of quat to kill 99.999% of common foodborne pathogen within 60 seconds.
- ✓ No-Rinse Sanitizing Wipes are disposed after use. Prevents risk of cross contamination or poor protocol practices that could lead to violations.

Rags get reused without regular quat testing resulting in inconsistent efficacy and risk of cross contamination.

Prone to violation due to common practice of leaving rags outside sanitizing solution after use.

## EASE OF USE

- ✓ No mixing or measuring. Simply Wipe. Toss. Done!™ Motivates staff to clean regularly, properly.

Prone to human error of not properly measuring the required quat sanitizing level.

## LIABILITY

- ✓ Pre-moistened wipe format eliminates spills, slips and potential liability.

Bucket solution is prone to spills that could lead to slips and potential liability.

## PROTOCOL INTEGRATION

- ✓ Easy to train employees on product use typically results in increased motivation to use.

Lack of knowledge; poor command of the English language; unsure of Quat level; unmotivated to test/retest.

## GUEST EXPERIENCE

- ✓ Sani Professional® wipes are perceived to be more sanitary, professional and enhance dining experience.

Use of rags are unsightly and off-putting to guests. Poor perception of a clean restaurant.

When it comes to general cleaning, Sani Professional® pre-moistened or dry wipes are a better alternative to cotton rags.

#### Cleaning Multi-Surface Wipes

- Quick-drying, no-streak formula
- Ideal for use on digital devices
- Highly recommended for front-of-house cleaning
