

THE ARROW PROMISE – LIVE INSPIRED. START AT HOME.

Made in the USA since 1961

About Us

Arrow is committed to American Manufacturing technology, material innovation, and investing in our people to produce high quality, inspired products at our facilities in Illinois & Mississippi.

We design, manufacture and distribute items in Hydration, Clear Filtration, Drinkware, Kids, and new Crystal Serveware products under our Arrow banner and for nationally recognized private label brands.

Sustainability Focus

Arrow's products are categorized as "Long Service Life" (not single use) and therefore are environmentally sustainable. All products are made of food safe materials and colorants - All are BPA Free. We voluntarily mark our products with Society of Plastics Industry identification recycling symbols.

We at Arrow continually search for ways to improve our environment to reduce waste and pollution that threatens our ecosystem. All our plastic scrap, used corrugated containers, wrapping materials and pallets are recycled. None of these materials are deposited in landfills.
